Trees for health - forever
1 - 2 November 2005
Johannesbu

Completion and dissemination of outputs

FAO NWFP Guidelines

- First (incomplete) draft available
- We need people experienced in teaching, field practice and theory to review document
- Also need case study material
- If you can help please pick up a copy and sign up with Jenny

Commercialising medicinal plants book

- Free copies will be sent to all participants
- I have a couple of hundred additional complimentary copies to distribute
- Please provide Luci with contacts and addresses for institutions that would make good use of the book

Handbook

- Please indicate which institutions and numbers of copies that would be required
- How should we make this available across the region?
- Institutional 'home' for publication so it can remain in print beyond the life of the project
